

GE HealthCare Lobbying Disclosure Policy

Updated January 2024

GE HealthCare is working to solve the greatest challenges in healthcare that patients and clinicians face today and in the future. Together, we are not only building a healthier future but living our purpose to create a world where healthcare has no limits. Public policy has a direct impact on the work that we do. Therefore, employees engage with public officials to advance smart health and technology policy at all levels of government—local, state, and federal. Employees educate officials on GE HealthCare’s operations, emerging technologies and markets, as well as on our views on public policy issues. All advocacy done by our employees on pending U.S. legislation is included in our quarterly Lobbying Disclosure Act (LDA) filings.

GE HealthCare conducts lobbying activities in compliance with applicable laws and regulations governing such activities. In the U.S., certain communications with federal, state, and/or local government officials or government employees may be reportable as lobbying communications included in GE HealthCare’s LDA reports and/or state or local lobbying disclosure reports. Certain countries outside the United States may also require disclosure of lobbying activities.

Before engaging in lobbying activities, employees are asked to contact GE HealthCare’s U.S. Head of Government Affairs & Policy or their designee. GE HealthCare regularly trains employees on what types of activities and communications constitute reportable lobbying activities. Prior approval from GE HealthCare’s U.S. Head of Government Affairs & Policy is required before GE HealthCare may retain an outside entity to engage in lobbying activities.

Reviewing and reporting lobbying expenses
